YOUNESS AMZIL

Full Stack Developer | React • Next.js • C/C++

https://linkedin.com/in/yoamzil | https://amzil.dev | amzilyouness@gmail.com | +212 600921846

Full Stack Developer from 1337 Coding School with experience building operational software and modern web applications. During my internship at Chaabi Cash, I developed DataFlow, a financial operations platform used to manage agency transactions, debts, and client records. Skilled in React, Next.js, TypeScript, and system-level programming with C/C++. Passionate about building reliable backend systems and scalable web applications.

WORK EXPERIENCE

CHAABI CASH

Full Stack Developer Intern | Jun 2025 – Nov 2025

EDUCATION

1337 CODING SCHOOL

Digital Technology Architect | Oct 2022 – Current

ALX MOROCCO

Software Engineering | Feb 2023 – Nov 2024

PROJECTS

DATAFLOW

Financial operations platform

- Developed DataFlow, a full-stack web app using Next.js 15, React 19, TypeScript, and Prisma/SQLite, with a bilingual (EN/FR) UI.
- Implemented secure admin auth and core workflows: advanced search/filtering, duplicate detection, multi-denomination cash counter, real-time debt tracking, and automated calculations.
- Led end-to-end delivery with testing and deployment as a Windows service via NSSM.

MOVIE FINDER APPLICATION

Full-stack movie discovery platform with real-time data

- Developed using React and Vite for optimal performance.
- Integrated TMDB API for movie data and trending content.
- Implemented search analytics using Appwrite backend services.

INCEPTION – DOCKER VIRTUALIZATION

System administration project demonstrating containerization expertise

- Designed and implemented multi-container Docker environment.
- Created custom Docker images for service virtualization.
- Built on personal virtual machine infrastructure.

SKILLS

Next.js | React | Javascript | Typescript | C / C++ | Docker | Git | TailwindCSS | HTML & CSS
